

Waking the monitor:

If screen is off, click power button on remote

Tap the enter key on the keyboard to “wake” the monitor (do not follow the “Connection Guide” that appears on the screen under “Check Device Power”)

Enter the password “lawcenter” to log-in

You can now use the monitor as a computer and log-in your email, Zoom, etc

To screenshare from a laptop or mobile device:

First follow the above instructions

Select the black AirServer icon in the bottom menu bar on the monitor

Click through the pop-up using the keyboard to find instructions for your device

Windows: select Windows logo key + K → select “ConferenceRm1”

macOS: select Control Center icon in menu bar → select “Screen Mirroring” → select “ConferenceRm1”

Chrome: select the time (bottom right of screen) → connect to Lawcenter wi-fi → select “Cast Devices Available” → select “ConferenceRm1”

Android: connect to Lawcenter wi-fi → swipe down from the top of your screen → select “Cast” → select “ConferenceRm1”

iOS: connect to Lawcenter wi-fi → open “Control Center” (swipe down from the top of your screen) → select Screen Mirroring → select “ConferenceRm1”
